Your Solar Power Proposal

Brief Overview of Springers Solar Grid Connect System Packages

1. Springers Low Voltage Specialists / Springers Solar is an established solar company working in Brisbane's solar industry for eight years. We can supply genuine testimonials from many satisfied customers attesting our quality service and workmanship.
2. *SPRINGERS INSTALLATION is warranted for five years.*
3. We do not use Sub Contractors. Springers Solar has a licensed electrical division to ensure your system is installed professionally. Our supervisor is a qualified 'Building and Construction Manager'. All employees have many years of solar industry experience.
4. We use BP Solar panels, and Suntech solar panels. These solar panels are warranted for 25 years with output of 80% guaranteed. Energy output warranty is more important than a simple warranty without further disclosure. Both of these reputable companies will honour their warranty without question for the life of the warranty.
5. These two systems are installed by our roofing experts with engineer certified roofing attachments to satisfy Australian standards and BCA (Building Code Australia) ensuring housing and insurance compliance.
6. We use German SMA Inverters with ten years or five years warranty. SMA inverters are world's largest inverter manufacturer.
7. *Our quote to you is fixed.....NO EXTRAS*
8. Our installed system package means just that.....The system is connected from your solar panels to your switchboard by our electrician including Energex notification. This is included in the quoted price.
9. After the installation is completed by us, and Energex have installed your new 'net' Smart Meter, our Construction Manager returns to your residence with your Installation Manual to fully explain your new grid connect system.
10. As part of our premium service, we will organise your RECS reimbursement.
11. Our electrician will provide the Certificate of Test for your solar grid connect installation.
12. With paperwork completed, a system is booked in your name with our supplier. In most instances, we can install within four weeks or as soon as stock is available.
13. We are solar accredited designers and installers through the Business Council for Sustainable Energy (BCSE).

To compare our prices with quotes from any other business,

Ensure that the above points are satisfied.

BP Solar Price List – Basic Prices

System	Inverter	Capacity	No. of panels	Daily Delivery
Gridkit 1400	SB1700	1400W	8	5.5kWh
Gridkit 1650	SB1700	1650W M	10	6.05kWh
Gridkit 2040	SB1700	2040W P	12	8.2kWh
Gridkit 2970	SB2500	2970W M	18	12kWh
Gridkit 4080	SB3800	4080W P	24	16.5kWh
Gridkit 4950	SMC6000	4950W M	30	20kWh
Gridkit 6120	SMC6000	6120W P	36	25kWh

Suntech Price List – Basic Prices

The Suntech solar panel system uses mono crystalline solar panels with a 25 year warranty and a five year warranty with SMA German designed inverters.

System	Inverter	Capacity	No. of panels	Daily Delivery
SG1080	SB1100	1080W	6 x 180W	4.3kWh
SG1440	SB1700	1400W	8 x 180W	5.6kWh
SG1520P	SB1700	1520W	8 x 190W	6kWh
SG1800	SB1700	1800W	10 x 180W	7kWh
SG2160	SB1700	2160W	12 x 180W	9kWh
SG3240	SB3000TL	3240W	18 x 180W	13kWh
SG4320	SB3800	4320W	24 x 180W	17.4kWh
SG5400	SMC6000A	5400W	30 to 180W	22kWh
SG6480	SMC6000A	6480W	36 x 180W	27kWh

Suntech Price List – Basic Prices

The Suntech solar panel system uses mono crystalline solar panels with a 25 year warranty and a five year warranty with European designed Xantrex inverters.

System	Inverter	Capacity	No. of panels	Daily Delivery
SGX 2520	GT2.8	2520W	14 x 180W	10.5KwH
SGX3240	GT2.8	3240W	18 x 180W	13kWh
SGX4320	GT5	4320W	24 x 180W	17.4kWh
SGX5400	GT5	5400W	30 to 180W	22kWh
SGX6480	GT5	6480W	36 x 180W	27kWh

Contact Us

These prices allow for:

- Delivery and installation in the Greater Brisbane Metropolitan Area.
- Installation on single storey home with a north facing roof and pitch up to of 30°.
- Up to 20m of cable from panels to inverter.
- Electrician costs for installation from grid connected inverter to meter.
- The annual output of this system is based on average for an unshaded system installed to optimum tilt and orientation.

Some conditions apply:

- If the meter board requires upgrading an extra charge may apply.
- Two storey houses may require access with extra safety rigging and may attract an extra charge.
- Roof structures requiring split PV arrays also may attract an extra charge.

Why Solar Electricity?

SAVE ON ENERGY – SAVE ON COSTS \$\$\$\$

The benefits of solar

- You are reducing the use of fossil fuels
- You are reducing pollution and greenhouse gas emissions
- Solar is clean, noise free, and cost free energy from the sun year after year.

SAVE MONEY ON ELECTRICITY BILLS YEAR AFTER YEAR

Feed in Tariffs

- 44 cents per kilowatt hour (kWh) for surplus electricity fed into the grid

System Description

- | | |
|----------------------------------|------------------------------------|
| • BP Solar Panels | 25 year warranty |
| • Suntech Solar Panels | 25 year warranty |
| • SMA German made Inverters | 10 year warranty (BP Solar System) |
| • SMA German made Inverters | 5 year warranty (Suntech System) |
| • Xantrex European made Inverter | 5 year warranty (Suntech System) |

How it works

- Solar panels are mounted on your roof and solar electricity is generated and fed directly back into the grid.
- You and your family do not change anything in your house because you are generating solar power on your roof.

Features

- All the fittings and attachments used by Springers Solar are certified by the Building Standards of Australia and the Australian Insurance Body.

Renewable Energy Certificates (RECS)

- A REC represents the equivalent of one megawatt hour of solar electricity generation. The value is based on a 15 year period according to size and location. RECS values can fluctuate up or down without notice.

Solar Credits

- Current RECS value multiplied by five (up to 1.5 kW of solar installed).
