Statement by Joe Springer General Manager Springers Solar

Our industry is generally one of stability in the solar grid connect business as the CEC (Clean Energy Council) maintains standards with their solar accreditation program. These accredited tradespeople are the designers and installers of Grid connect systems to your roof.

As in all industries within a government rebate program a number of businesses in their over exuberance will take shortcuts.

Springers Solar continue to have our own staff of tradespeople to personally work for our customers.

When you are considering your choice of a solar company to put panels on your roof delivering energy for the next 25 years, you are urged to, consider the quality of the business and staff rather than the cheaper option of cheaper solar panels and subcontractors.

The Insulation and Solar Hot Water program was today changed by the government and we include in this bulletin a statement by Minister Peter Garrett <http://www.environment.gov.au/minister/garrett/2010/pubs/mr20100219.pdf>.
