

 ENERDRIVE |  DOMETIC

THE CANOPY POWER SYSTEM RANGE

Revolutionising mobile power solutions.

THE CANOPY POWER SYSTEM RANGE

- ✓ Built with high quality components
- ✓ Pre-wired inhouse where possible
- ✓ Customisable to suit your needs
- ✓ Proven to withstand the harsh Aussie conditions
- ✓ Simple installation
- ✓ 5 Year Warranty

CHOOSE YOUR ORIENTATIONS

Each power system is available in a number of different orientations, meaning they can be mounted on either the passenger's side, driver's side, or the ceiling (select models only) of a vehicle canopy.

CHOOSE YOUR COLOURS

Make your power system pop with the traditional acrylic 'ENERDRIVE | DOMETIC Green' faceplate, or if you like to be more subtle, we also offer a matte black faceplate for that classic look.

CHOOSE YOUR BATTERY MONITOR

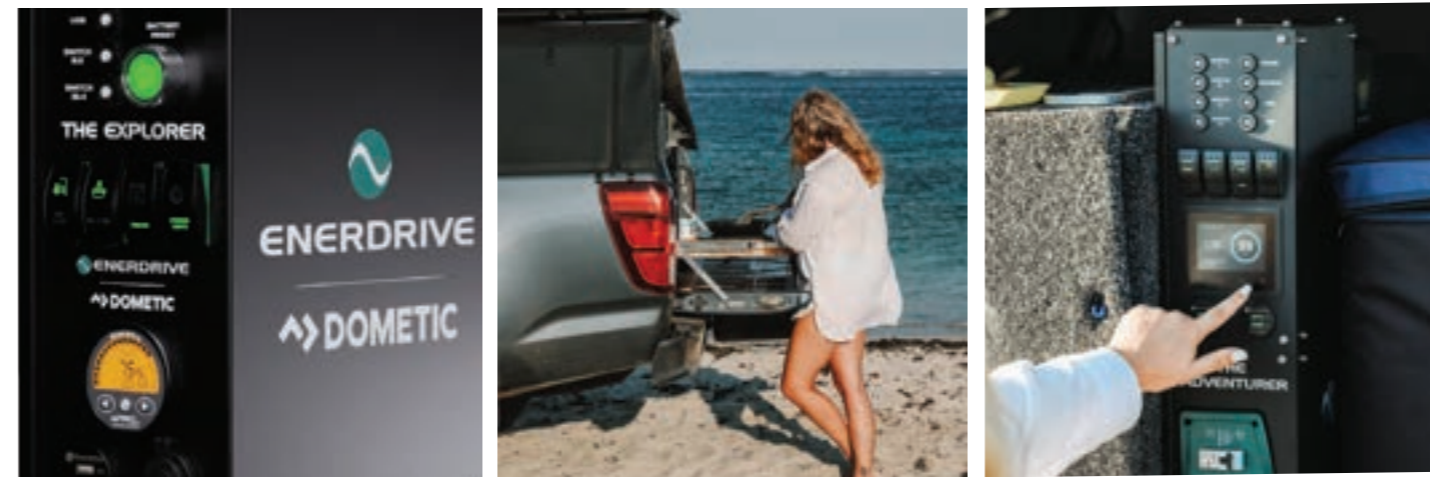

Your choice of either ePRO+ or Simarine Battery Monitoring.

ePRO+:

- Complete battery status information at a glance on a single bank (% , V , A , Ah , W)
- Able to monitor up to 3 battery voltages (eg. House, Start & Generator bank)
- Full battery history information available
- Bluetooth dongle available as optional extra for free smartphone app connectivity

SIMARINE:

- Colour screen
- Able to monitor multiple tank/temps via the main battery shunt
- Optional SCQ50 shunt available for certain models for individual current monitoring of DC2DC, fridge and DC loads
- Free WiFi phone app

CUSTOM ROCKER SWITCHES

Never second guess what you're turning on or off again! With our extensive range of optional laser-etched switch covers to choose from, you can easily identify and organise the different appliances connected to your power system.

The opaque etched text and symbols allows for back lighting, making it easy to control your switches even in the dark! For the full list of options, check the back page of this brochure or visit our website.

BUILT-IN RESET BUTTON

The "Built-In Reset Button" makes re-starting a flat lithium battery a breeze. No longer do you need to apply a voltage to the battery terminals to wake up the battery. Press the button and within seconds, the battery will come back to life ready to accept a charge source to rejuvenate the battery.

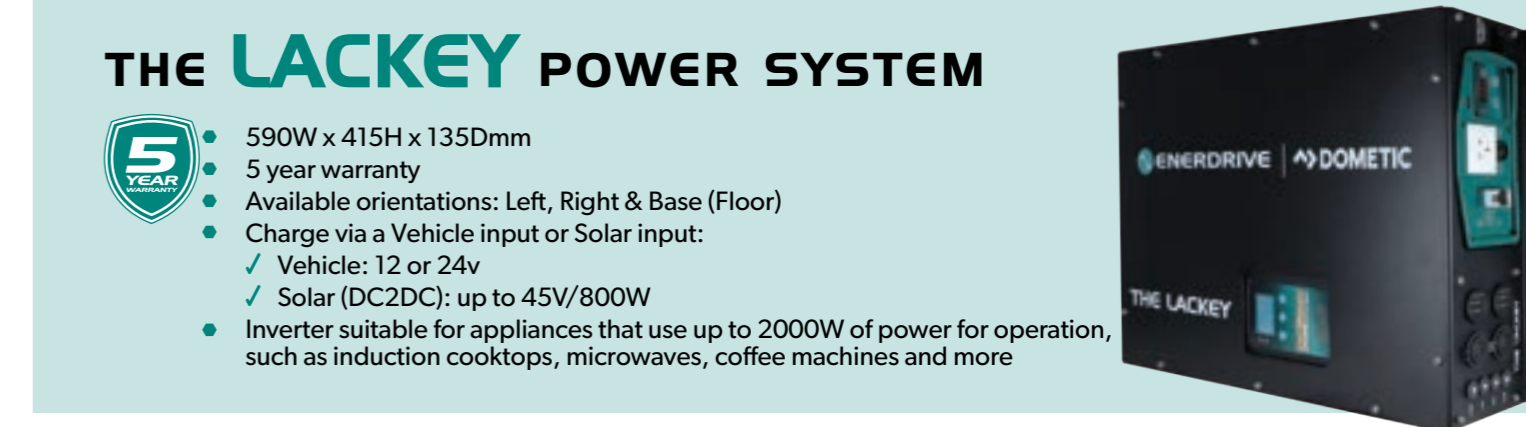

THE EXPLORER POWER SYSTEM

- 455W x 330H x 155Dmm
- 5 year warranty
- Available orientations: Left, Right & Top (Ceiling)
- Charge via a Vehicle input or Solar input:
 - ✓ Vehicle: 12 or 24v
 - ✓ Solar (DC2DC): up to 45V/800W
- Your choice of either ePRO+ or Simarine Battery Monitoring
- Lithium low battery reset button (12V start battery input only)
