About Invicta Lithium

The Invicta Lithium 24V range has been specifically designed for replacement of similar size Lead acid batteries. The family is comprised of the popular sizes found in the lead acid range but with the added benefits of Lithium Iron Phosphate (LiFePO4) technology and is ideally suited to deep cycle longer run time applications.

Features & Benefits

- Large number of cycles >2000 (100% DoD)
 Up to 8 times cycle life of SLA lowering your total cost of ownership
- Safe and stable chemistry & Integrated BMS
 The use of LiFePO4 along with the integrated BMS ensures protection against over charge / discharge, temperature and short circuit providing the highest degree of safety
- Greater capacity utilisation 60% more than SLA
 Gives longer runtime than equivalent SLA
- High energy density (less than half of the weight of SLA)
 Lowering total weight of application
- Fast recharge

 Battery is charged and ready to be used sooner
- Flat Discharge Curve
 Longer run time & more efficient use of capacity
- Extremely low self-discharge rate
 Can sit unused for longer periods of time
- UL1642 at cell level
- IEC Certified
