

Inline Standard Blade Fuse Holder

ASB-H

Protect your circuits and cabling from excessive currents and prevent damage and electrical fires with the Alvolta In-Line Standard Blade Fuse Holder. These little powerhouses are designed to safeguard your automotive or marine electrical applications, accommodating standard blade fuses up to 30 amps.

Manufactured with high-quality materials, Alvolta In-Line Standard Blade Fuse Holders are both durable and dependable. With their simple, pre-wired design, you don't need any special tools for termination.

Suitable to add in new electrical designs or to assist in the maintenance or repair of existing systems.

A weatherproof cover and 4mm² tinned copper cable is included.

Features:

- Robust and reliable
- Compact design
- Quick and easy to connect
- Weatherproof
- 30 Amp rating
- Accommodates ATM automotive standard blade fuses
