

M6 Dual Linked Terminal Stud

ALVS62R

Take your electrical wiring to the next level with the Alvolta M6 Dual Linked Terminal Stud. Perfect for the DIY enthusiast, this connector makes it easy to connect multiple voltage lines and hook up positive return lines to a single cable. This connector is universally used for automobiles, cars, boats, and RV battery terminal connectors, making it a versatile addition to your electrical wiring arsenal.

Made from glass-fibre reinforced nylon, it provides great mechanical strength and durability. Connect high-amperage cables securely and terminate multiple large conductors with ease. With the Alvolta M6 Dual Linked Terminal Stud, you'll have a reliable and durable solution to your electrical wiring needs.

Suitable for:

Product Properties

| | |
|------------------------|------------------------------|
| Maximum Voltage | 70V DC |
| Maximum Current | 150A |
| Terminal Diameter | M6 (6mm) |
| Terminal Material | Stainless Steel |
| Hex Nut Material | Stainless Steel |
| Contact Strip Material | Tin-Plated Copper Alloy |
| Base Material | Glass Fiber Reinforced Nylon |
| Colour | Red |
| Dimensions | 51 x 48 x 43mm |
