RAPID CROSS CONNECTOR

PRODUCT SHEET

Rapid cross connector

The convenient way to connect overlapping rails

- Economically priced, quick and safe
- Can be assembled from above
- No additional tools required
- 25-year warranty*

The **Rapid cross connector** can be fastened to any rail which has a Schletter-Klick channel M8. One central fastening point with a single bolt guarantees quick assembly. The distribution of forces is structurally optimized by the new hook-in and clamp technique, to ensure that profiles cannot be twisted due to unsymmetrical loads.

All benefits of the Rapid system can now also be leveraged by the cross rail system!

Contrary to its predecessor, the **Rapid cross connector** (item no. 129063-000) is delivered completely pre-assembled, thus keeping the assembly effort to a minimum.

Further information at: www.schletter-group.com

*in accordance with our warranty conditions

① Hook in laterally and twist.

② Click in!

③ Position the rail and bolt together from above.
