

NEW PRODUCT RELEASE

50W Rechargeable Soldering Iron Kit

P/No. 56394

FEATURES

- 50W Multi-function lithium soldering iron with interchangeable tips
- Ready to solder in just 10 seconds
- Suitable for trade applications with enough charge (40 mins continuous runtime) to get you through the day
- Integrated L.E.D light illuminates soldering area
- Includes convenient, durable storage case

Interchangeable tips included and available as a replacement kit.

Point

Chisel

Hot Knife

KIT CONTAINS:

- 50W Lithium Ion Rechargeable Soldering Iron and Stand
- Chisel, cone and hot knife tips
- USB charge cable
- Solder
- Brass tip cleaner
- Safety Cap
- Storage Case

NEW PRODUCT RELEASE

50W Rechargeable Soldering Iron Kit

Narva has added a second soldering iron to its range of electrical accessories – joining the butane gas powered soldering iron (P/No. 56390BL) is a cordless, rechargeable lithium ion powered soldering iron that can heat itself ready-to-solder in just 10 seconds.

More than just a soldering iron, the kit comes with additional interchangeable tips to suit a variety of jobs, including chisel, cone, and hot knife for cutting (e.g. rope). An integrated L.E.D light illuminates the working area to ensure adequate visibility and accurate soldering. Doubling as a visual check that the iron is hot, the L.E.D only illuminates once the button is pressed and heating commences.

Providing a runtime of 40 minutes, the lithium ion battery is fully charged in 3.5 hours using the included USB to Micro-USB cable. The 10 second heating time ensures quick, convenient use of the iron, with a maximum temperature of 600°C. For safety, the soldering iron features overcharging, overdischarging, short circuit and electrostatic discharge protections. Also included in the kit is a safety cap and idle stand to ensure user safety during heat up, use and cool down.

The kit comes contained in a convenient and durable case ideal for professionals

Ideal for all forms of soldering jobs

Includes interchangeable tips
(Hot knife pictured)

SPECIFICATIONS

Dimensions (Soldering Iron)	210 x 30 x 23mm
Weight (Soldering Iron)	100g
Charging Time	3.5 Hours
