

M10 Terminal Stud

ALVS10B

Get the best connections with the Alvolta M10 Terminal Stud. Made from Glass Fiber Reinforced Nylon, the stud can connect two or more voltage lines and hook up positive return lines to a single cable. With a 70V rating, it is perfect for handling high-amperage cables securely and terminating multiple large conductors. The Alvolta M10 Terminal Stud is easy to install, and it will save you time and money in the long run by reducing the number of cables on your battery terminals.

With a compact design, this component is a must-have for those who want to keep their battery compartments neat and tidy. Invest in the Alvolta M10 Terminal Stud today and start enjoying cleaner, more reliable power in your battery compartment.

Suitable for:

Product Properties

Maximum Voltage	70V DC
Maximum Current	150A
Terminal Diameter	M10 (10mm)
Terminal Material	Stainless Steel
Hex Nut Material	Stainless Steel
Base Material	Glass Fiber Reinforced Nylon
Colour	Black
Dimensions	51 x 48 x 44mm
